## Office Action Summary

Application No.

10/611,731

Applicant(s)

FEY ET AL.

Examiner

Erma Cameron

Art Unit

1762

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 05 June 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-6, 8-10, 12 and 13 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-6, 8-10, 12-13 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

## **DETAILED ACTION**

### ***Response to Amendment***

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-6, 8-10 and 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rattee et al (4315790).

'790 teaches applying a composition to a fabric or any flexible substrate by a transfer process, the composition being comprised of a dye or pigment, a film-forming polymer, a crosslinking agent and a catalyst (see Abstract; 3:55-4:15). A layer of a transferable composition on a supporting flexible substrate (paper, metal foil, plastic film) is pressed to the fabric while heating, such as between heated roller or heated plates (an example of contact heating), and then the supporting substrate is removed. Curing of the composition may be complete before removal of the supporting substrate (6:65-7:11). The polymers include acrylics. The fabric or other flexible substrate could be part of an automotive part or fitting, such as car seats or other flexible parts. In some cases, the substrate to be coated receives more than one coat (see Examples), thus meeting the limitation of claim 3. The composition to be transferred may be dried after being

Art Unit: 1762

applied to the supporting substrate, but this is not required (6:44-64). Example 6 shows a composition that is printed onto a release paper, and then brought into contact with a fabric, without a drying step, thus inherently meeting the tackiness limitation of claim 5. The examples of printing the composition onto the supporting substrate such as contact paper meet the limitations of claim 13 (applied to a sub-zone). See Abstract; 1:4-11; 4:6-15; 4:57-5:29; 6:56-7:11; Examples.

### ***Response to Arguments***

Regarding applicant's argument that Rattee requires flexible substrates while applicant requires non-flexible substrates, the list of substrates in claim 1 would be inclusive of flexible substrates, such as a flexible plastic automotive fitting. Moreover, the claims do not claim non-flexibility as a requirement of the substrate.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1762

4. Claims 4 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rattee et al (4315790).

‘790 is applied here for the reasons given above.

‘790 does not teach that the supporting substrate is textured, but this would be an obvious variation on the ‘790 process.

‘790 does not teach that the applied compositions are transparent, but it appears that some of the examples would be transparent, for instance Example 12 which contains no pigment.

### ***Response to Arguments***

a) Claim 4: Regarding applicant’s assertion that Rattee does not teach a textured backing foil, the paper of Rattee that serves as the backing foil inherently has some texture to it, and in light of no definition of the amount of texture that is required, meets the limitations of claim 4.

b) Claim 12: Regarding claim 12, the applicant has not demonstrated that the various Examples of Rattee are non-transparent. The Examples with pigments and inks are not necessarily non-transparent, even though they may have color. Colored is not the same thing as opaque.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1762

6. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a) Claim 13: it is not clear what is meant by “applied *only* onto one or more sub-zone(s)” (emphasis added). It would make sense to claim only one sub-zone, but claiming only one or more does not seem to make sense.

#### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Art Unit: 1762

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erma Cameron whose telephone number is 571-272-1416. The examiner can normally be reached on 8:30-6:00, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on 571-272-1423. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
